Explore your inner-geographer, uncover the mysteries of the deep, and discover the secrets of the underworld. In VR: -Feel as if you are there. -MIRAGE creates the perfect VR environment to immerse you in the lore of the island you walk through. -MIRAGE supports the OCCULUS rift, HTC vive, and non-VR too. NOTES: 1. ALL REFLECTIONS REQUIRE 2GB RAM, AFTER WE DIDN'T HAVE TOO MANY STALL, WE ADDED IT. 2. You must download and install both the iPad App and the Android App for your best experience. 3. Windows, Mac, Linux and Android are all supported. HOW TO PLAY: After launching both apps, follow the easy instructions. Music Player: Start with the song you want to play, press the Play button and start exploring. MRIAGE App: After launching the app, navigate to "Activate this music player" and follow the instructions. About Audio in VR: With Vive, you can make linear sound space for 360 degrees, providing positional sound even when not looking at the screen. This is achieved through an audio engine that is three times faster than conventional sound engines and ensure that no software runs while audio is playing. Stereo Audio: Stereo Audio (left and right) is supported through the OCCULUS and OCCULUS RIFT HMDs. Audio Interpolation: Audio Interpolation is supported through the HTC vIVE HMD. How to use MIRAMIE: -If using VR, you should start the music from the music player on your iPad or the MIRAMIE app on your Android (or iPhone, etc). -If on a non VR device, the app will play audio from your music player. -The app will play the music and will automatically react to the music (as it would if you were in VR). -You can change the 'Time Delay' in the settings menu under the "VR" section. If you're not in VR, you will still get audio reflecting from the sounds, but the reflections won't match the music as well. -The app would not work well if the music was too far away from the user. For music player and Android (or iOS, etc): -To play the song, simply press the play button.

Features Key:

- Score three dates in a 'room'
- Win bonus coins and upgrade your rooms
- Make friends in the same time zone
- Match with strangers and win dates
 - Meet cute guys
- Stake claim to an apartment
- Date a stranger and maybe move in together

How does it work?

C14 is a game like any other, but first you need to get yourself a Room. Inside a Room, you have 3 Hearts; one for a one night stand, another for just friends and a third for your current guy. You can find more about those in the in-game FAQ.

What is the C14 Dating Game?

In the 'C14' online dating game you can sign up, look through potential matches, send them messages, go on date after date and see who is going to hook-up with you. And best of all, you can upgrade your rooms to stod some extra hearts!

How many times a day will I have to message a potential date?

The maximum amount of people you can date at the same time is you can play the game for 7 hours straight. That's also the maximum time you have to spend on a single date. After 7 hours, you cannot be online for the reminder of the day.

C14 is the most popular dating game in the world, not just the most popular in the 'iPhone category'; so I didn't expect the game to take off so quickly.

One of the most asked questions I was getting was "how many dates can I have in one day?". By manipulating the data, we were able to find out that you can flirt with over 60 people at the same time.

If it takes you 1 hour to have a date, and you make it 15 minutes into the next day, you get -1 hour of dating for the day. That means if you can have up to 60 dates a day, and that takes up five hours, you will have 55 hours left, which is almost half a day
