What's new in Madievals:

Review Quakeu buffs extend their ability to stretch and walk across surfaces into a puzzle game. This time it's all about collecting items as you wander aimlessly into tight spaces. Let's find out how it holds up to the original game in this **Quakespy Review**. At first, Quakespy seems simple enough. But there are some additional elements to quck through in order to find items you need to complete levels. This fast-paced platformer is great to play after a relaxing day. It isn't too hard, but it will challenge even the best of you. When all is said and done, you'll want to get your Q-Spot on for a delightfully dimensional experience. Difficulty Quakespy is definitely a puzzle game. In fact, puzzles are its driving force, though they are never too difficult or easy. It's clear when you are nearing a solution to a puzzle, since a light blue border appears around it, and the game becomes a little easier. Beyond that, its difficulty adjusts as you get better at the game. If you're really having a hard time, it's not impossible. However, in order to avoid frustration, keep grinding at it until you master each stage. Graphics The graphics don't look like they were made with 1995 in mind. They are 3D, but thanks to many symmetrical designs, all visuals are quite bright. Unique designs and charming voices are the icing on the cake. The

opening cinematic, the "Fairytale" level, and each level's theme song, are particularly great. Sound I'm not much of a fan of the normal audio, but I loved this level of Quakespy. It has a floating musical feel that can't be found anywhere else in the game. If you're a fan of the traditional style, you might find it too much, though. There are quite a few glitches, as I've reported on before. I recommend it nonetheless; it's great music. Gameplay Quakespy has you on missions, and everything revolves around the missions. While you travel the world in search of items, you'll usually have to collect one item to get a map and get to that specific mission. Once you get it, you can head to the "mission area" and tackle it. The strong positioning is key to your success in the game. Your marker moves at high speed, so you need to jump in the ideal spot.
